About ZSOS

With a legacy rooted in over a decade of commitment, we take pride in guiding students and professionals through transformative journeys.

For over 5 years, Zenith School of Studies has been a trusted academic partner. Each year, we witness thousands of students embark on the challenging path of applying to UK universities.

Recognising the confusion and complexities inherent in the process, we strive to be the guiding light that helps students make informed decisions when selecting the right university.

ZSOS Free Service

We want to make things easy for you, and that's why we have an international team that speaks different languages.

ZSOS Free Consultation

We want to inspire and help people who want to improve their education or reorient their career, so we offer reliable and flexible admission services.

Our free services:

Educational consultant

We're fully aware that choosing your field of study or university is a monumental decision. That's why we gather all the crucial details you need, ensuring you're well-equipped to make the best decision for your future.

Process Application

We deliver a wide range of complimentary services designed to foster your career growth, backed by a dedicated team of specialists who offer support in multiple languages including Romanian, Bulgarian, Spanish, Italian, and more, ensuring we speak your language.

How we can help you?

OUR AIM

We aim to be the go-to folks for educational help and finding the right place for you. We're confident we'll make it happen by doing excellent work, having fantastic employees, and staying true to what we believe in.

OUR MISSION

We want to help everyone, no matter who they are, get the best education possible. Our mission is to make the world better by supporting individuals in reaching their full potential. We're giving our student services for free, from signing up to graduation, because we believe in creating a better future for everyone.

We represent over 15 educational institutions in London, Leeds, Birmingham, Manchester, Northampton and Leicester .

Reasons

to study

The UK and its universities are well-known for their high standards in education and quality, offering a wide range of courses including **undergraduate** and **postgraduate** programs, apprenticeships, and part-time studies.

The UK offers a unique cultural experience, from nature and spectacular scenery to business, accounting, health and social care and digital marketing.

As you study, you'll also be honing the skills essential for success. The educational journey and environment at UK universities are designed to equip you with the professional competencies you need to thrive.

For several decades, the UK has appealed to more than a million students from various countries, drawing them to **study here**.

Here are a few key reasons to think about pursuing your studies in the UK:

Furthermore, you'll find numerous career prospects awaiting you. There's also the chance to apply for scholarships, and you'll receive financial assistance from the UK Government during your studies.

Your education from the UK will be valued globally, thanks to the worldwide reputation of UK universities for their educational excellence. These institutions consistently rank among the best on the international stage.

Advantages of Studying in the UK

Students in the UK enjoy many discounts, such as:

Students who are 18 or older are eligible for a 30% reduction on adult fares when purchasing travel passes for all Transport for London (TfL) modes of transport, such as the underground, trains, trams, and buses.

Shopping and dining discounts range from 10% to 30%, with popular clothing brands like Asos, Boohoo, New Look, and River Island offering significant savings. Food brands such as Dominos Pizza and McDonalds, along with health and beauty retailers like Boots Opticians and Superdrug, also provide student-friendly prices. Technology and mobile brands, including Adobe Creative Cloud, Microsoft Office, Apple for education, Vodafone, and O2, offer special deals, making essential tech and connectivity more accessible to students.

The UK is globally celebrated for its high standards in education, making it an ideal environment for achieving your utmost potential. Its universities are praised for innovative teaching styles that equip students with skills sought after by employers, ensuring a smooth transition from academic to professional life.

Degrees in the UK

Educational institutions: Universities and Colleges.

Colleges primarily concentrate on vocational training (Further Education), and it is in these institutions that HND courses are typically offered.

Before starting your studies at a UK university.

Bachelor's Degree (BA Hons/BSc) -

This university-level qualification typically spans 3 years, except for Medicine or Dentistry students, who require 6 years to finish their studies.

Top-Up Course - By adding an extra year with a Top-Up Course to your HND (Higher National Diploma), you can elevate your qualification to a full university degree. Thus, two years of an HND Course plus one year of Top-Up Course equals a Bachelor's degree equivalent.

Universities are primarily focused on academic studies (Higher Education), offering programs such as Top-Up Courses, Bachelor's Degrees, and Master's Degrees.

Master's Degree (MA/MSc) - After finishing your undergraduate studies, you can pursue further education with a postgraduate or master's degree. This advanced degree typically requires 1 to 2 years to complete.

HND Course - An HND (Higher National Diploma) Course involves two years of study in a specialised higher education program tailored to the practical demands of various sectors. You have the option to extend this qualification with a Top-Up Course. Completing just the two-year HND Course awards you a Higher National Diploma, a formal UK credential that is recognised internationally.

Student Loans

Student Loans are a type of financial aid provided by the UK Government to enable individuals from diverse economic backgrounds to attend university.

Individuals who fulfil certain criteria can apply for this advantageous financing option. The UK government's aim isn't to profit from students but to integrate as many skilled individuals as possible into the workforce.

Put simply, this is financial support from the Government to cover the costs of higher education, including both undergraduate and postgraduate studies, and also to assist with students' living expenses during their time in education.

You should know that there are two types of student loans:

Tuition Fee Loan

This setup handles tuition fees by directly sending the payments to the university or college, freeing students from the responsibility of making these payments on their own.

Maintenance Fee Loan

A loan provided to help with living expenses, paid straight to the student.

Eligibility requirements for Student Loans

For eligibility for a UK Government Student Loan, you must satisfy the following conditions:

You need to have been a resident in the UK since before January 2021. Nonetheless, there are exceptions where individuals from outside the EU might qualify for these loans, and our team can provide more detailed guidance on this.

You need to possess at least an intermediate proficiency in English.

You must hold Settled status, Pre-settled status, an indefinite residence permit, or any other visa type that permits you to apply for government funding.

Applicants holding Pre-Settled status are required to submit evidence of employment or financial backing from a family member (spouse or parents for those under 25).

Applicants possessing Settled status are not required to furnish employment proof.

You can check if you are eligible for UK Government funding to study at university by following [this link](#).

Repayment for Student Loans

The repayment conditions for Student Loans in the UK typically include the following elements:

Student Loans in the UK are designed to be repaid only when the borrower is financially able to do so, functioning more like a tax than a conventional loan. Repayment begins the April after course completion, but only if the borrower's annual earnings surpass the threshold set by Student Finance England.

- As of the 2024 update, repayment calculations are based on a percentage of income exceeding this threshold, ensuring that repayments are income-contingent.

The repayment thresholds for various plans have been updated.

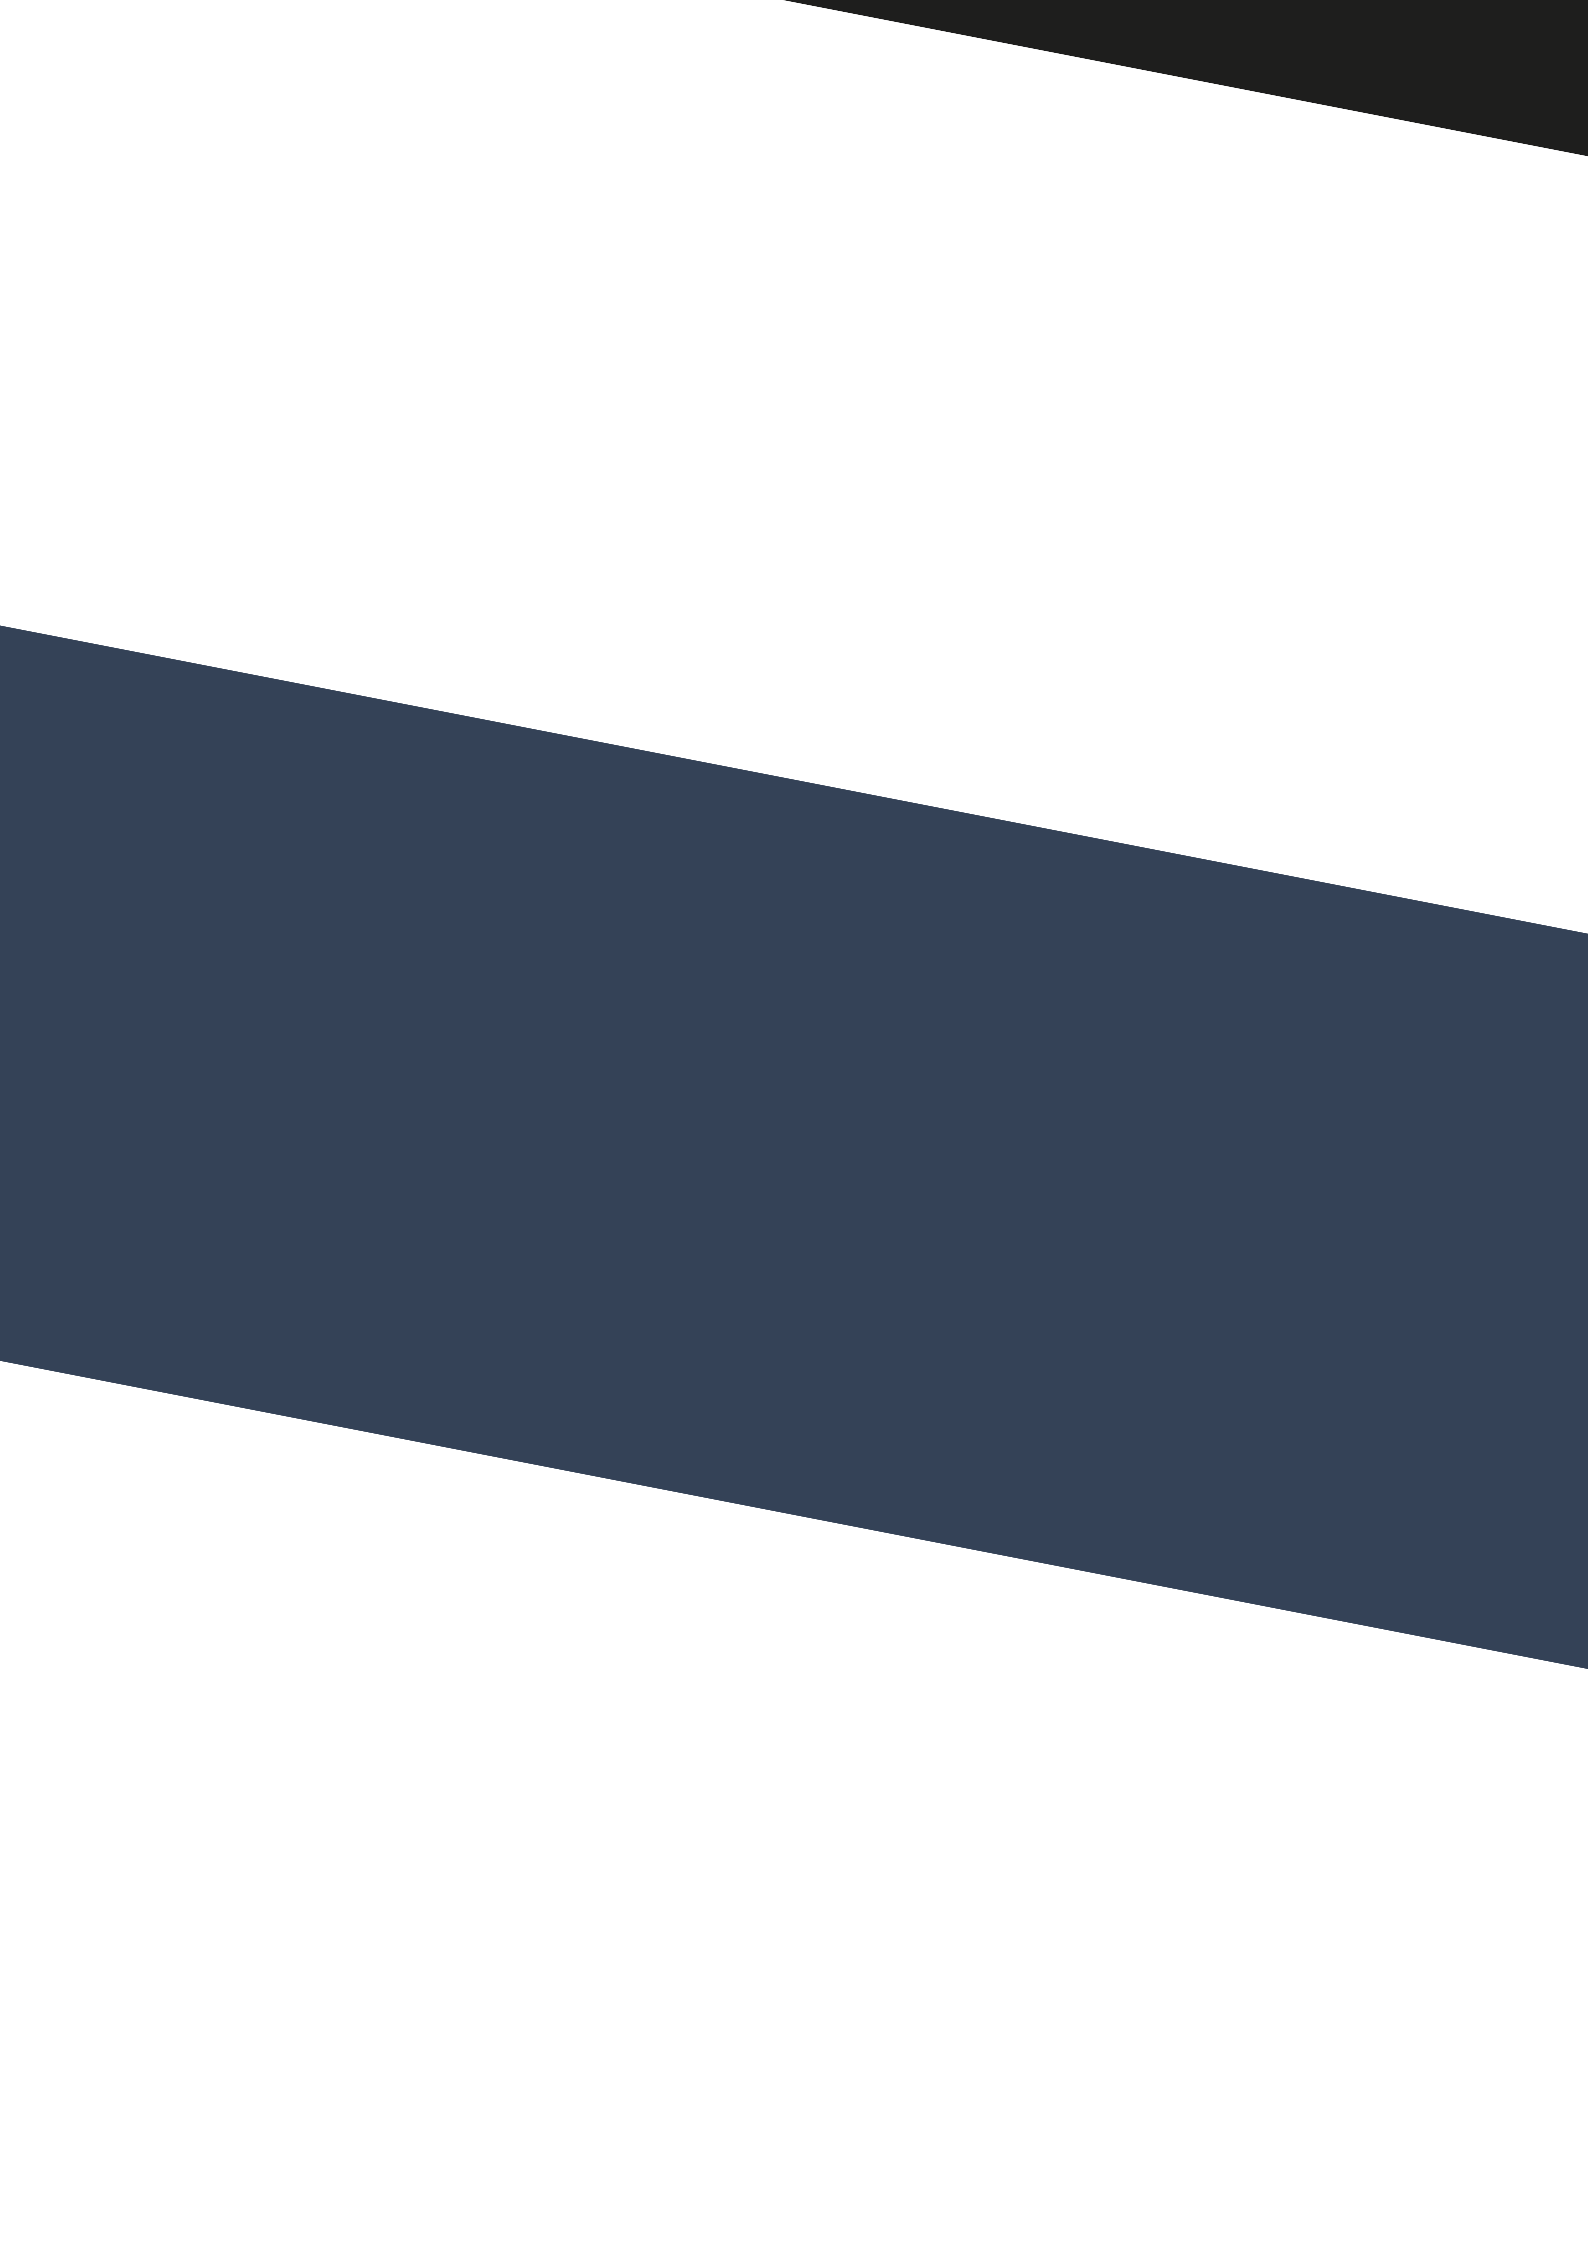

For example, Plan 1 has a yearly threshold of £22,015, and Plan 2's threshold is £27,295. The repayment is typically set at 9% of the income over the threshold for Plans 1, 2, 4, and 5, and 6% for Postgraduate Loans. Changes in annual income will affect the repayment amount, with the possibility of stopping payments if employment is lost until the income threshold is exceeded again.

Furthermore, the interest rates for Plan 2, Plan 5, and Postgraduate Loans have been capped at 7.6% as of January 2024, despite the RPI rate being much higher. This cap is reviewed monthly and is intended to keep student loan interest rates in line with or below prevailing market rates for comparable unsecured personal loans.

The system is designed so higher earners from university education pay more, with loan cancellations after 30 years or in certain conditions like low income, promoting fairness [\[86†source\]](#) [\[87†source\]](#) [\[88†source\]](#).
